# Rules of Recycling Right

## Recycle Right

When In Doubt...  
**THROW IT OUT!**

### EMPTY

No food or liquid should be in containers.

### CLEAN

Rinse containers to remove residue.

### DRY

Let clean containers dry to prevent paper and/or cardboard from becoming wet or soiled.

### NO BAGS

Bags cause damage to processing equipment.  
All recyclables should be loose.

Don't be an aspirational recycler! If you are not certain that an item is recyclable, contact your hauler to clarify. Most hauling companies will have a list of what is acceptable posted on their website.

All non recyclables, as well as recyclable items that are not properly prepared, are ultimately removed from the recycling stream and sent to the landfill. Removing these items takes processing companies additional time and effort, which reduces profitability and drives up the cost of recycling. ***When you do not take the time to recycle right, you are negatively impacting the recycling economy. Do your part by recycling right every time!***
